

# OneStream

The ultimate media gateway for your PBX.

## A new way to save, thanks to convergence

OneStream is the new media gateway that connects to your PBX system, offering in one single device all the technology that your company requires for saving: 2 GSM lines, 6 VOIP (SIP-H323) channels and 6 trunk lines (6analogue lines or 2/4 ISDN BRIs).

OneStream cuts your fixed to mobile call costs, but also lets you take advantage of VOIP lines connecting your companies, using Mobility Extension and many other services.

## Mobility extension services on any mobile phone

Thanks to OneStream's Mobile Extension services (MobEx), you can use a mobile phone just the same way you use your PBX extension. Whenever anybody rings your office phone but you are not there, thanks to OneStream, you can anyhow be available behave just the same way as if you were sitting at your desk, just dial star key. You can talk to a colleague and than transfer the call or transfer the call directly (attended and blind transfer).

## All the VOIP advantages even for your PBX

Thanks to OneStream you can take real advantages from VOIP services for your company without modifying your internal communication network or PBX (connected to analogue or BRI-ISDN lines), nor replacing your telephone sets. You can use OneStream in order to connect remote seats of your company or enable your co-workers to work from home, thus offering colleagues that are out of the office the possibility of calling from home or hotel as if they were in their office using a standard broadband Internet connection.

## The most suitable gateway for any PBX system

OneStream FX or BRI (2 or 4) connects to any PBX system (IP, ISDN or analogue) also in series to the lines and manages routing among GSM-VOIP-PSTN lines for both outgoing and incoming calls.

OneStream G (Full VOIP) connects to the IP PBX directly in VOIP; in such case OneStream connects your GSM lines to your system without installing trunk line cards.

# OneStream

Find out how to add new services and save money using OneStream for your business.

- Access VoIP Services without needing a new PBX
- Add new MobEX Services without changing your habits
- Cut fixed to mobile telephone costs of your business
- Send and receive text messages through the web interface
- Manage monthly minute budget
- Save money thanks to the call back
- Your investment immediately paid back thanks to LCR Services

## Reduces fixed to mobile costs of your business

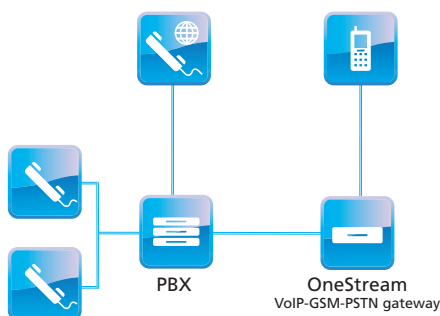

OneStream offers immediate savings on telephone costs, taking advantage from the mobile operator special tariffs for mobile calls placed from the fixed telephones of your company.

Maximise your savings using 2 SIMs of different operators, taking advantage of the several special offers available.

## Minute budget and text messages

OneStream can manage a monthly minute budget for you to prevent unpleasant surprises and expensive budget exceeding of your SIM card flat rate contracts.

Furthermore, thanks to OneStream you can send and receive text messages through the easy-to-use web interface and, if you are using MobEX virtual extension services, you can receive a text message notifying missed calls directly on your mobile phone.

## Suitable even for your VOIP PBX

If your PBX belongs to the new generation and includes VOIP services, you can take advantage of OneStream connecting GSM lines to your system without buying new trunk cards for your PBX, but directly attaching OneStream to your LAN connection.

## Special advantages if you have offices abroad

If one of your sites is abroad and connects via VOIP, for example, to another OneStream, you can use GSM or PSTN lines connected to the remote OneStream in order to place fixed to international mobile calls at the rate of a fixed to national mobile call and also an international call at the rate of a local call in the termination Country.

## Secure and easy to configure

OneStream will manage all the routings between the available networks and can be easily configured locally or remotely via web interface. In case of a power failure of fault, OneStream will automatically provide fixed line service.

## Save thanks to Call Back feature

Thanks to the Call Back feature, OneStream can call you back directly on you on your mobile phone, thus saving money.

Call OneStream SIM card number: OneStream will call you back immediately on your mobile phone and connect you with a defined telephone extension.
